

# ROVEMA packaging solutions for fresh produce

Proven solutions for reliable and robust packaging

inno-tech & Prins are now part of the ROVEMA family

## Experts in fresh produce

Fresh products must be packaged and brought to the customer quickly. At the point of sale, consumers like to see potatoes, onions or carrots through display windows,

- ▶ **Fit for fresh produce:** Machine housing under pressure to avoid dust residuals
- ▶ **Quality:** Robust stainless steel machine design, made in Germany
- ▶ **High speed:** Up to 100 pillow bags/min for baby potatoes
- ▶ **Machine-related efficiency:** up to 99%

nets or perforations. Plastic films can be used, but also papers from the flat film web, e.g. barrier papers.

- ▶ **Future proof:** Suitable for a wide variety of bag shapes
- ▶ **Versatile:** Prepared for production with polyethylene films, laminated films, as well as paper packaging materials
- ▶ **Minimal operator intervention:** Autonomous machine operation thanks to automatic packing material change-over and Sense&Seal product detection
